Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, Wage and Classification Division

DATE: 18 February 1953

FROM : Chief, Administrative Staff, Office of Communications

SUBJECT: Readjustment of the Table of Organization for the [REDACTED] Area

25X1A6a

25X1A6a

1. The partial activation of various functions under the Chief, [REDACTED] Area, have shown that the Table of Organization for this area, which was approved 28 November 1952, will not properly support these functions. For the most part, the assignment of extra training problems and the opening up of unexpected lateral lines, have caused this overloading.

2. This pressure will be relieved by making the following additions and changes:

a. Delete position #10 (Commo Tech Radio) GS-7, under Operating Facilities, [REDACTED] 25X1A6a

b. Add position #11 ~~(Diesel Mechanic)~~ ^{*MECHANICAL ENG. (DIESEL)} GS-9, under Office of the Chief, [REDACTED] 25X1A6a

25X1A2d1

c. Create new position, Commo Tech Radio, GS-9, [REDACTED] under [REDACTED] Signal Center. 25X1A6a

25X1A6a

d. Create 2 new positions, both Commo Tech Radio, GS-7, under the [REDACTED] Signal Center.

3. These additional positions will make no change in the overall Foreign Field ceiling for the Office of Communications.

4. It is requested that the above change to the presently authorized T/O be approved and the records amended accordingly.
